# MySQL Assignment 1 – DDL Commands & Constraints

```
drop database if exists employee;
create database employee;
USE employee;

create table departments (
department_id int primary key,
department_name varchar(100) not null unique
);

create table location (
location_id int primary key auto_increment,
location varchar(30) not null unique
);

create table employees (
employee_id int primary key,
employee_name varchar(50) not null,
gender enum('M', 'F'),
age int check (age >=18),
hire_date date default (current_date),
designation varchar(100),

department_id int,
foreign key (department_id)
references departments(department_id),
location_id int,
foreign key (location_id)
```

```
references location(location_id),
salary decimal(10,2)
);

SELECT * FROM departments;

SELECT * FROM location;

SELECT * FROM employees;

alter table employees
add column email varchar(100);

alter table employees
modify designation varchar(2000);

alter table employees
drop column age;

alter table employees
rename column hire_date to joining_date;

rename table departments to departments_info;

rename table location to locations;

SELECT * FROM departments_info;

SELECT * FROM locations;
```
